

Multisystem Inflammatory Syndrome in Children (MIS-C)

**The Experiences of NewYork-Presbyterian/Columbia
University Irving Medical Center**

Join a panel of Columbia University pediatric specialists for an informational webinar on Multisystem Inflammatory Syndrome in Children (MIS-C), the new pediatric syndrome associated with COVID-19. Columbia's expert pediatricians will discuss symptoms to look out for, common questions from parents, current treatment options, possible long-term effects and the disease's similarity to Kawasaki disease, and the latest research on MIS-C.

Moderated by award-winning CBS medical correspondent Dr. Max Gomez, the webinar will feature a Q&A for questions from participants. Please join us!

Date: Tuesday, June 9, 2020

Time: 6-7pm
