

PPE Update:

ASU Luminosity Lab has the ability to produce face shields, and the network to connect community practices with PPE supplies.

The most streamlined method for PPE requests would be to submit the request on <https://poperesponsenetwork.asu.edu/>. The request will get routed appropriately with minimal work needed on the providers end.

Additionally, ASU Luminosity has also developed two low cost sterilization systems for reusing N95 masks. See <https://asunow.asu.edu/20200707-low-cost-sterilization-units-combat-n95-shortage-help-businesses> for more details. Please contact the department directly for more information on these units.

ASU is happy to connect directly as needed.

PREMGroup.org

Located in Tempe, AZ

PREMGroup is a local nonprofit located in Tempe that manufactures PPE supplies. This group supports the efforts of community providers and offers PPE at cost for Phoenix Children's Care Network (PCCN) members.

Steve Abbit may be contacted by phone or email for orders and requests.
