

# LOOKING FOR WAYS TO IMPROVE LANGUAGE IN A CHILD WITH AUTISM?

**Barrow Neurological Institute at Phoenix Children's** is recruiting participants for several research studies to evaluate the safety and efficiency of a medication called Leucovorin Calcium used to improve language in children with Autism Spectrum Disorder.

## **Participants must:**

- › Be between the ages of 2.5 and 12.5 years old
- › Be diagnosed with Autism Spectrum Disorder
- › Have a moderate language delay
- › Have no history of regular seizures or other significant medical conditions that require immediate care
